

## Mask Policy for TBASSC Agility Trial

We are monitoring the recommendations of the CDC, State, and County health agencies, and are adopting a mask policy that we feel provides reasonable and sensible protection for everyone.

Face Coverings are to be worn in the building at all times.

That is a properly worn mask or a gaiter that is at least 2 layers

A shield may only be worn while sitting or competing otherwise a mask must be worn

Cloth masks must:

Cover both nose and mouth including the chin

Be at least 2 layers

Shall be anchored at all 4 corners behind the ears, neck or head

Does not have an exhalation vent

Or :

An N95 type mask that:

Is anchored at all 4 corners

Does not have an exhalation Vent

A neck gaiter must be at least 2 layers or may be used to help hold a mask on more tightly. It must be pulled up over the nose at all times.

A Face Shield (while competing or sitting)

Covers the entire Face from forehead past the chin

Has a "wrap" at the edges

Wrap must extend enough to cover the sides of the nose and mouth

Face Coverings are to be worn at all times in the building, and may be removed only while drinking or eating. People must be seated while eating and drinking, and masks must be replaced when finished.

Face coverings may not be modified except to create a better fit around the ears or head. Anyone wearing face covering improperly, or using a face cover that has been modified in any other manner is considered to be in violation of our policy, and will be asked to leave. No refunds will be issued
